

Refit

*Machine refit in
manufacturer quality*

Refit in manufacturer quality!

Benefit from qualified staff and their decades of experience in mechanical engineering for refitting your INDEX and TRAUB machine or for component refits. Take advantage of the possibilities to modernize your machine. If the conditions of your machine allow it, it can also be upgraded to new control and drive technologies.

The following work is carried out as part of the machine refit:

- ▶ Cleaning and repainting of the machine
- ▶ Disassembly down to the basic components
- ▶ Assembly according to standard production specifications
- ▶ Replacement of all mechanical wear, bearing and guide elements
- ▶ Replacement of hydraulic wear parts, e.g., hydraulic hoses, valves
- ▶ Renewal of the complete energy supply system (hydraulic, lubrication and electrical lines)
- ▶ Overhaul of motors
- ▶ New bearings for spindles, new clamping cylinders
- ▶ Replacing the safety glass
- ▶ Supplement of refits and peripheral devices
- ▶ Commissioning with geometry check
- ▶ Software update to the latest version

Upgrade of the control system to the current standard production version

Example series INDEX G200 to Solution Line:

- ▶ Replacement of the complete electrical equipment with current standard production version including control cabinet, control system and control panel
- ▶ Replacement of all electrical lines, motors, and sensors
- ▶ Use of the current standard software and INDEX options
- ▶ Higher productivity and shorter cycle times

Refit – your benefits:

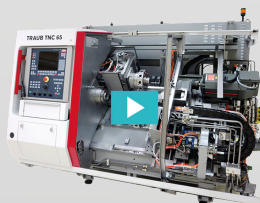

- ▶ Ensuring high productivity and quality
- ▶ Improving machine availability
- ▶ Continued servicing capability ensured
- ▶ Processes, NC programs and tools can be retained
- ▶ 12 months warranty
- ▶ If requested, the machine can be installed and removed incl. commissioning

Repurchase of used machines

We are also interested in repurchasing your used INDEX or TRAUB machine. This applies in particular to machines built after 1995.

Refit is offered for the following machines:

INDEX C, G and V series / ABC / INDEX MS25, MS32 & MS52, TRAUB TNC- / TNX- / TNL series
